-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2155

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The method of assembling a computer network for shipping to a customer as recited in the claims is a mental process of doing business. The first two steps and the last step merely suggest to ship what the customer orders to the customer. The rest of the steps merely suggest to remotely configure the ordered components before they are being shipped. The method steps in the claims are not implemented by a machine. It is a mental process of how to fill an order.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goss (USP 6,236,901) in view of Reichmeyer (USP 6,286,038).

As admitted by Applicants on page 2 of the specification, Goss teaches a build-to-order manufacturing process. The steps of receiving, identifying and packaging are inherent steps in a build-to-order manufacturing process. Goss does not teach the steps of remotely configuring a network. See at least the abstract in Reichmeyer. Reichmeyer Teaches configuring a network remotely. If the system to be shipped is required to be configured, it would have been obvious to a person of ordinary skill in the art to, as

taught by Reichmeyer, configure the manufactured merchandise before it is being shipped out so that the customer does not have to do so.
